## LETTER FROM THE PRESIDENT

Following a challenging past year for Delma, our partners and clients, all impacted by the unprecedented situation, we look optimistically forward to 2021.

As motivation for a positive outlook, the new year represents a number of special occasions and new experiences for us. 2021 marks 75 years since the release of Delma's first chronograph, which we are commemorating with a special Bicompa edition of our renowned Heritage model limited to 75 pieces per color.

Our signature Blue Shark collection will be expanded to include the Blue Shark III Azores edition in two special dial colors to support ocean conservation efforts driven by our partner Magnus Lundborg. As with our brand ambassador Nick Moloney and the Oceanmaster Antarctica in 2020, the project in the Azores will enable

us to contribute to education about and protection of endangered sharks through the proceeds of our new timepieces.

We also had the privilege to partner with Miranda Merron as she successfully completed the Vendée Globe earlier this year with the Delma Oceanmaster on her wrist. Following her progress as she accomplished the remarkable feat of independently circumnavigating the world has further enlightened us on the demands of offshore sailing and will surely influence future advancement in our sailing inspired timepieces. In keeping with the theme of giving back, Miranda selected the World Wildlife Foundation to receive a

second Oceanmaster which was on board for the journey and auctioned to benefit their mission.

This year, we will also introduce a new member of the Cayman collection, the Cayman Field, a new take on the popular causal divers' line appointed for explorers focused on land adventures. With three different bracelet options including a natural canvas strap and a black dial highlighted with orange numerals and green luminous indexes, the new edition is classic yet distinct.

Delma is honored to be able to make a difference for wildlife and people through the creation of our timepieces.

By embracing the experiences and adventures of our partners and clients, we are motivated to continuously improve our designs for all those who rely on our watches for style, punctuality, and safety. As a family-owned Swiss watch brand, it is only through education, a strong focus on innovation and the commitment of our talented watchmakers and partners that we are able to deliver enjoyment to women and men year after year. We are especially grateful for your ongoing support and interest in our timepieces and it is my pleasure to present you with our 2021/22 catalogue.

Fred Leibundgut  
Chairman & CEO Delma Watch Ltd.

## HISTORY OF DELMA

An inspirational story of a family-owned watch manufacturer that has prevailed in Switzerland for nearly a century. Our history fuels our future innovation and our achievements and values continue to guide us on our way through the 21st century.

The 1920s represented a paramount era for the Swiss watchmaking industry. A new type of watch became increasingly popular: the wristwatch. Until then, men were only seen carrying pocket watches, but with the advent of the first airplanes and cars, the wristwatch rose in significance because of its practicality. It was a time in which many watch brands had to

change their production completely. The brothers Adolf and Albert Gilomen saw this as the ideal moment to enter the industry, so in 1924, they founded their own watch company in Lengnau. As was a custom adopted by many other brands, they strategically registered four brand names: Thuya, Midland, Delma, and Gil. In some cases, previously registered names

were later used for watch families, such as the Midland, the Gilomen company's first chronograph. Delma would eventually be established as the company's name. Early production efforts focused on delivering precise, robust timepieces of great elegance. Lengnau was ideally situated in the heart of the Swiss watch region. The proximity of a nearby watchmaking school ensured access to well-trained personnel. Equally, the region contained an established network of independent furnishers that guaranteed the supply of all necessary components. One of them, the Landeron movement manufacturer, had a first-class reputation for its chronograph movements. In the forties, Delma launched an exemplary chronograph based on this movement which is often considered the starting point for Delma's dedication to sports watches.

After establishing a strong foundation in the hands of the Gilomen family, the company changed ownership and in 1966 it was renamed Delma Watch Ltd. by Ulrich Wüthrich and his partner. They lead the business until 1996 when it was passed down to Ulrich's son in law Fred Leibundgut. Today, Delma is still family-owned and his son Andreas Leibundgut serves as Head of Marketing. We are continuously committed to creating new watches that represent our brand's personality and dedication to quality. Through our experience and the incredible accomplishments of our courageous partners we gain insight and inspiration to fuel our innovation. As one of the last independent Swiss watch manufacturers, we feel more committed than ever to the tradition of superior watchmaking and are proud to focus on consistently delivering attractive, quality timepieces for generations to come.

# OVER NINETY-FIVE YEARS OF TRADITION

Delma has been passionate about building watches for almost a century. Since the very beginning, we are committed to delivering stylish and sturdy timepieces that enhance sports and leisure pursuits. This catalogue is designed to showcase our ongoing tradition of crafting pioneering and timeless watches and demonstrate our history and achievements.

When the Gilomen brothers embarked on the challenge of founding a watch company in their hometown of Lengnau, Switzerland in 1924, the region had just begun to proliferate with watch manu-  
facturers. This area between Grenchen and Biel would later set standards for the Swiss watchmaking industry and represent unmatched global quality.  
Establishing a watch business at this time meant dedication and innovation was crucial as the future development of the industry was wide open. The brothers were certain they wanted to be at the forefront of progress and were wholly committed to creating timepieces that performed with style. In keeping with their entrepreneurial and inventive spirit, the company promptly created

1924 \_\_\_\_\_ 1946 \_\_\_\_\_ 1954 \_\_\_\_\_

The foundation

In 1924, the brothers Adolf and Albert Gilomen founded A. & A. Gilomen S.A. in Lengnau near Grenchen, Switzerland. In 1966, the company was renamed Delma Watch Ltd. after one of the initial four model names following the takeover by Ulrich Wüthrich & partner.

First chronograph

The Delma insignia first appeared on pocket and wristwatches in 1933, followed by the first chronograph in 1946. Recorded under the name Midland, the classic 18-karat yellow gold chronograph equipped with a mechanical hand-winding movement signifies the beginning of Delma's emphasis on sports watches

A true racing machine

A sporty chronograph with a stainless-steel case is released, boasting an ETA Valjoux 7736 R movement. The Tachymeter indication on the dial, the luminous hands and genuine leather or rubber strap made it the ultimate racing timepiece.

1969 \_\_\_\_\_ 1975 \_\_\_\_\_ 1981 \_\_\_\_\_ 1988 \_\_\_\_\_

The first automatic divers' watch

The Periscope was Delma's first wristwatch with increased water resistance. Although not yet up to present-day standards, this model started Delma's divers' watch tradition.

Professional divers' watches

As of 1975, the company was enjoying great success with its two professional divers' watches: the Shell Star and the Quattro. Delma's stainless steel automatic models with rotatable bezels remain popular with professional and hobby divers to this day.

The launch of the Shark

Named for its precision and sharp design elements, Delma's Shark model had a rectangular stainless steel case encompassing an automatic ETA 2789 movement. The intricate bracelet, unique octagonal dial and diamond cut indexes made this unique watch worthy of admiration.

Delma Moonphase pocket watch

When pocket watches came back in style for a brief period along with the three-piece suit, Delma used the opportunity to produce a prestigious Savonette example in 18-karat gold. Behind the carved spring lid is a refined hand winding Unitas movement with pearled bridges, moon phase and date indication.

## 1991

### The Klondike collection

The Delma Klondike was launched in 1991 as an annual limited-edition mechanical gold and platinum collection and has served as Delma's signature line ever since. It was recognized for its exceptional quality and ingenuity by its preselection in the Calendar category at the Grand Prix d'Horlogerie de Genève in 2017

## 1995

### The Delma Platinum collection

In the mid-nineties Delma enjoyed great success with its Platinum collection including winning the 1st prize in the precious metal category at the JA International Jewelry Show in New York.

## 2004

### The steel Klondike

As an extension of Delma's successful signature line, the Klondike was redesigned in stainless steel in 2004. Equipped with a new movement, its refreshed forms and materials made it a noteworthy timepiece among Delma's sports watches.

## 2011

### Blue Shark I

The Blue Shark joins the ranks of Delma's exceptional divers' watches with a splash. Flaunting a sporty, sturdy disposition and eye on innovation, the original Blue Shark was introduced as a progressive performance divers' watch with water resistance to 3000 m / 9900 ft that encompassed the latest advancements in functionality and strength.

## 2014

### The Midland Chronograph

A new sports watch, carrying the name of the company's first chronograph is introduced. While it pays tribute to the original, the bold look with exposed screws is undoubtedly fresh. Equipped with a big date and ergonomic push pieces, the Midland Chronograph is a revered companion for aspiring and professional athletes.

## 2016

### Relaunch of the Shell Star

The revival of Delma's first professional divers' watch marked an exciting moment. Technological advancements allowed us to produce a new Shell Star that kept the distinctive sporty look of the company's landmark model with features that were unimaginable in the 1970s. Now equipped with a helium valve and water-resistance to 500 m, the Shell Star is a modern precision instrument.

## 2017

### The racing collection expands

The introduction of the Oceanmaster series stimulated Delma's "Time to Perform" campaign and solidified the company's companionship with extreme sailing. The collection is inspired by Delma's collaboration with the IMOCA Ocean Masters and has special features for nautical navigation and tactical planning.

## 2019

### Launch of the Blue Shark III

Delma's Blue Shark models have continuously exceeded perceived boundaries of endurance and the Blue Shark III is no exception. Standing out as one of the strongest divers' watches ever produced, the new Blue Shark III is Delma's supreme divers' watch with water resistance to 4000 m / 13120 ft. As the series grows, and new technology is introduced, the Sharks become increasingly powerful, resilient, and groundbreaking.

## 2021

### 75 Years of Delma Chronographs

Two Heritage chronographs join the collection in invigorated yet classic style. A Bicompax Chronograph limited to 75 pieces in tribute to the milestone maintains essential characteristics of our first chronograph and a three sub dial model extends Delma's original Heritage series with modern elegance.

their first chronograph wristwatch in the forties when an advanced chronograph movement was realized. The sporty and elegant piece set a precedent for quality and creativity, thereby solidifying the brand's mission.

The fifties and sixties marked the beginning of extensive underwater exploration, and it was clear that developing a quality divers' watch was imperative. In 1969, the Periscope, Delma's first timepiece with

enhanced water resistance, was born. The sea has been Delma's companion ever since and a few years later in 1975, Delma issued its first professional divers' watch, the Shell Star.

The power of water has continuously motivated us to devise watches with the potential to go further and dive deeper. The integration of new technologies such as the helium valve on the first Blue Shark in 2011 and the screw down crown on

all our current divers' watches exemplify how Delma's strength is constantly augmenting.

We also embrace our history with classic timepieces that reimagine styles from the founding years of Delma with a modern edge. The Heritage and Continental recall a time when wristwatches were not only a fashion statement but a necessity.

Our watches are enjoyed and relied upon equally beneath and atop the water. Relationships with our brand ambassador and sailing champion Nick Moloney, the Brazil based Naufragios diving team and ocean conservationist Magnus Lundborg among other adventurous partners enable us to continually put our watches to the test and ensure persistent quality and enlightened evolution.

## PHILOSOPHY & TECHNICAL STANDARDS

As a family business, we consider quality across all our products and the commitment of our staff to be the foundation of our legacy and our future. Our continuous dedication to producing Swiss Made timepieces represents a long tradition of quality watchmaking and has guided us in presenting innovative watches for over ninety-five years without interruption.

Delma has been located in Lengnau near Biel, at the core of the Swiss watchmaking region, since its foundation in 1924. Our watches are designed in-house to be instruments that are fit for everyday use and to withstand extreme conditions. The life of every Delma watch starts as a sketch. The concept is then rendered in 3D to deliver a realistic visualization of the future timepiece. Rapid prototyping enables us to analyze the touch and feel of every new model as it develops. Once the design has been approved, case production begins and all components are carefully checked. Each watch is individually assembled in our atelier by one skilled watchmaker with utmost concentration. First, the dial is paired with its movement. Next, the extremely fine hands are placed on the axles. Finally, the completed inner workings are fitted into the case, the crown is fixed and the watchcase back

is carefully closed. The finished piece is then tested by a separate watchmaker in order to guarantee a strict separation of production and quality control. We utilize only the best materials available. The crystals of our watches are comprised of transparent sapphire, a substance almost as hard as diamond. For our stainless steel watches, we employ grade 316L steel, which offers a high resistance to scratches and corrosion. Our black models are coated with physical vapor deposition (PVD), a specialized method which yields an absolutely even surface or diamond like carbon (DLC) for ultimate imperviousness. Our divers' watches are equipped with a screw-down crown and a screwed back to guarantee long-term resistance to water and humidity. Unidirectional bezels ensure decompression times can never be mis-

guided. Some of our divers' watches are equipped with a helium escape valve to further protect them from potential damage caused by internal pressure. All our movements come from the most reliable Swiss partners. Guaranteed leaders in their fields, these manufacturers boast a long history of quality design and production. The intricate workings are decorated to our specifications to give them the unmistakable and highly desired Delma look and can often be observed through a transparent case back on our automatic watches. To ensure that we stay up-to-date with the latest developments in the industry

and are able to constantly implement new functionalities, designs and materials, our skilled personnel regularly undergo rigorous certifications and training. Our partnerships with ocean adventurers support our quest to design sailing and diving watches that deliver an optimal combination of attractiveness, performance and reliability while our heritage inspires reinvented classic timepieces. All our watches have been carefully conceived and tested to serve our valued customers for a lifetime of wear and enjoyment.

## MAGNUS LUNDBORG PARTNERSHIP

Magnus Lundborg embodies our mission to continuously expand the technical potential and impact of our timepieces. As a free diver and ocean conservationist based in Sweden, he is dedicated to drawing attention to endangered underwater species in the North Sea and beyond.

He uses his award-winning photography of some of the world's most rare and magnificent creatures to illustrate the need for their conservation. His striking images capture the beauty of these incredible animals while exposing the impact of destructive behavior and aim to stop unnecessary trawling of the oceans.

Our partnership was announced on World Oceans Day in 2020, when we proudly shared Magnus' images of aquatic species in brilliant focus. Equipped with a Delma Blue Shark III, a model named after one of his favorite subjects, he continues to capture powerful images of endangered animals. Through his carefully composed

images of creatures great and small from the colossal Humpback Whale to the tiny Pipe Fish, Magnus uses his camera for a purpose. "Through the camera lens, I want to show you the beauty, the vulnerability and the importance of preservation of nature and species." He is currently working on "Wild Atlantic: Beyond the North Sea" a book about large wildlife in the Atlantic which aims to expose the impact of overfishing in this area. In Summer 2021 he will take part in the Megalodon Project, a Shark Tagging Project in the Azores using pioneering research to better understand the life

and habitat of sharks. Magnus alongside a team of scientist will conduct a study on marine megafauna to educate the public and government, define conservation strategies and create sustainable solutions essential to protecting natural resources and guaranteeing reproduction in key locations. We are excited about the opportunity to directly support this endeavor through the launch of a new Blue Shark III Azores edition.

## NICK MOLONEY PARTNERSHIP

No one puts Delma watches to the test like sailing champion Nick Moloney, a true ocean adventurer who routinely sets world sailing records. Nick relies on his Delma watches to keep him on target and propel his life forward during his many daring activities, adventures and accomplishments.

Nick has established 15 world sailing records and circumnavigated the globe 3 times in the Volvo Ocean Race, the Trophée Jules Verne, and the Vendée Globe throughout his 30-year sailing career. His tenacious spirit drives him to redefine the meaning of excellence and parallels the design philosophy of Delma so closely that Nick became our brand ambassador in 2017. Nick's perspective on time is interwoven with his Delma watches which accompany him – the Oceanmaster for extreme ocean adventures, the Shell Star for free diving, and the Rialto for daily wear. Nick admires and trusts his timepieces implicitly, declaring, "My relationship to my Delma timepieces represents the single most important point of reference in my everyday life. I live in a world that is completely reliant on trusted points of reference and the absolute best use of time." This philosophy characterizes everything that Nick

does, from pursuing new sailing records to accomplishing great things in his varied business and philanthropic ventures. In 2020 Nick granted us an undeniable opportunity to develop a new model that would assist him and his team on their expedition to Antarctica to commemorate its discovery 200 years ago. The limited edition of 200 pieces introduced a blue textured dial inspired by the frozen landscape and a special Antarctica engraved case back to Delma's sailing inspired series. The new timepiece not only assisted during the excursion but through

Nick's experience, we were introduced to the Antarctic and Sothern Ocean Coalition, which supports and protects this fascinating continent. We are proud to contribute a portion of the proceeds of each Oceanmaster Antarctica to their preservation efforts.

As Delma's brand ambassador, Nick's legacy will continue to serve as a deep source of inspiration to help shape innovation, new designs and technical elements in future Delma sports watches.

## NAUFRAGIOS PARTNERSHIP - DOCUMENTING UNCHARTED WRECKS

Experts operating in profound and intense wreck diving environments depend on their instruments to be reliable in the most extreme circumstances. In 2018 Delma partnered with the Brazil based Macadamia Naufragios dive team in pursuit of exploring historic wrecks along the US Coastline. Delma's world class divers' watches performed in tandem with the team and facilitated the creation of an exciting documentary series.

Every serious diver knows, his or her divers' watch performs the most integral function behind a dive. From timing stages of the dive to gauging the depths of the unknown, divers must be equipped with all of the tools required for success, and sometimes even survival, at extreme depths and in confined spaces. Due to the advanced features and striking design of Delma's divers' watches, executive producer and lead diver Marcelo Guimaraes chose three models to ac-

company him and the other divers on their adventures. Marcelo stated that Delma watches equipped them with a "highly reliable way to plan and monitor our team's numerous complex dives and intricate filming activities." The show, released in late 2018, tells the story of three experienced divers who traveled the world in search of the most fascinating historic wrecks. Our partnership with Naufragios, which means shipwreck in Portuguese, proves

that Delma's divers' watches deliver extreme water resistance at almost limitless depths. Other key features appreciated by the diving team include extra scratch resistance for cave and wreck dives, sturdy unidirectional bezels, and extreme legibility in even the darkest conditions. Delma's partnership with the Naufragios team and key collaborations with other professional divers around the

world, along with rigorous product testing, serve as an integral part of Delma's next-generation design strategy. In 2019, the Blue Shark III and the Cayman joined the established ranks of Delma's divers' watches like the Blue Shark II, Santiago and Shell Star, the three models that accompanied the Naufragios team on their thrilling underwater quests.

RACING COLLECTION

## KLONDIKE

This signature collection combines Delma's mastery in design and complicated movements to create an exquisite timepiece. Our flagship model, the Klondike Moonphase, features a day-and-night indication on which a star-spangled night sky is offset by a radiant depiction of the golden sun. This representation is applied on a rotating disc indicating the 24-hour rhythm of day and night. The romantic moon phase indicator beneath the chronograph's hour counter and the pointer date hand are among its other unique elements.

## CONTINENTAL

Similar to 1960s cars, renowned for style and performance, the Continental possesses remarkable craftsmanship and design. The bicompass Chronograph, inspired by Delma's models of the period, is captivating near and far with a refined sunray brushed dial and contrasting counters, surrounded by an intricate Tachymeter. The striking red seconds hand, the brushed and polished stainless steel case and retro pushers prepare the Continental for speed and accuracy in all endeavors.

## OCEANMASTER

Inspired by the world's best offshore sailors, the Oceanmaster collection combines Delma's expertise in watchmaking with knowledge of open sea navigation. Now offered in 3 unique editions, each series boasts the robustness of a true divers' watch in combination with key features for skippers. The limited edition Oceanmaster Antarctica was developed for our ambassador Nick Moloney's journey to Antarctica to commemorate its discovery 200 years ago. The new Oceanmaster Tide possesses a tidal tracking feature with its sleek unidirectional bezel indicating the transition between high and low tide.

DIVER COLLECTION

## BLUE SHARK III

Delma's divers' watches reached exceptional depths in 2019 with the Delma Blue Shark III – with extreme water-resistance to 4000 m / 13,120 ft. The sturdy unidirectional bezel and helium escape valve ensure that it is primed for even the most critical demands of professional divers. Enhanced crown protection and luminous markers enable divers to explore uncharted territory with confidence in all lighting conditions. An exchangeable rubber strap with bespoke tools makes the watch easily modifiable for adventures on land or underwater. This superb limited edition diving instrument arrives inside a special Blue Shark box in anticipation of its first extreme underwater excursion.

## SHELL STAR

One look at this watch, and you know it's tough. The crown protection, the brushed stainless steel case and the helium valve among other enduring features make the Shell Star a tool for professionals. The tradition of the Shell Star goes back to 1975, when Delma's first professional divers' watch launched under this name. This iconic model became a landmark for the company, serving as a model for many other divers' watches. In 2018, Delma enhanced the Shell Star collection with the introduction of a DLC-coated limited edition Black Tag model inspired by the world's best free divers.

## CAYMAN

The Cayman looks back to vintage Delma divers' watches introduced in the 1970s in 3 distinct varieties. The intricate details and bright finishes of the original are inspired by the landscape and wildlife of the Caribbean. The Cayman Worldtimer brings a global perspective to the Cayman family with a bidirectional bezel engraved with 24 cities, each representing a different time zone. The newest series, the Cayman Field is available with 3 different bracelet options including a natural colored canvas strap that complement the modified dial, perfect for lovers of sports and leisure activities.

## COMMODORE

Many consider the Commodore to be our most elegant diver's watch. With water resistance to 500 m / 1650 ft, unidirectional bezel and large characteristic luminous hands, the Commodore surpasses any divers' expectations in appearance and performance. The classic materials and timeless finishes transition effortlessly into a leisure timepiece. Details such as the magnifying glass accentuating the date window make this watch a precious instrument in the ocean or as an object of admiration at a cosmopolitan party.

## SANTIAGO

The Santiago, available in an appealing selection of color and material combinations, is Delma's most popular divers' watch due to its classic appearance and great features, including water resistance to 500 m / 1650 ft. Offered as a 3-hand, GMT and Chronograph in a range of colors, the Santiago is a statement in all varieties. All versions possess an easy to grip unidirectional bezel and mechanical models have a transparent case back to showcase the intricate movement.

## SEA STAR

The Sea Star possesses the robust nature of a true divers' watch with captivating style. The characteristic fluted bezel, riveted indexes and Roman numerals make an elegant statement while sturdy construction and water resistance up to 200 m / 660 ft mean the Sea Star is prepared for all endeavors. Ladies and gents can choose matching finishes or flaunt their own style with four dial options and two metal finishes.

## PIONEER

The 20th century abounded with noteworthy advancements in avionics, science and technology by bold pioneers. Embodying the essence of a true explorer, the Delma Pioneer combines the classic elegance of Delma designs from the 40s and 50s with the sophistication and durability that characterize the entire Delma collection. In either a chronograph or 3-hands automatic model, this timepiece stands out with great legibility and functionality.

## DRESS COLLECTION

## HERITAGE

Reminiscent of Delma's earliest timepieces, features such as the domed sapphire crystal and curved dial revive vintage details in a modern scale. The refined case accentuated by bold numerals or slim indexes set upon a luxurious sunray-brushed dial incite elegant simplicity. Originally offered in a classic 3-hand design in automatic and quartz, an exclusive series of Bicompx Chronographs limited to 75 pieces each, and a new stainless steel version based on the Valjoux 7750 movement have been introduced in 2021 to celebrate 75 years of Delma Chronographs.

HERITAGE QUARTZ

## CORDOBA

The Cordoba is an extra-flat dress watch of exceptional elegance designed to complement any occasion. Wear it at a dinner party or at work, and you'll always have a timepiece that suits the moment. Its lancet-shaped hands are set atop a captivating clou-de-Paris guilloché surrounded by classical Roman numerals and baguette indexes. Other special touches include an elegantly framed date indicator and diamond polished appliqués.

ELEGANCE COLLECTION

## RIMINI

The youthful exuberance and sporty appeal of the Delma Rimini make it suited for those who embrace life with passion and tenacity. The Rimini accompanies you as an elegant every-day watch that adds individuality to diverse wardrobe choices and adventures. Reflected by the sunray-brushed dial, the diamond-set bezel contributes an extra boost of light. Its ethereal feel and casual sophistication make the Delma Rimini the perfect all-around watch for both relaxed and elegant occasions.
